The Delta Packager with reciprocating heat seal module

**The Delta MOD-TECH®
Reciprocating Heat Seal Module
Offers Cost and Time Saving
Solutions in Packaging.**

It provides a more accurate seal and permits a variety of patterns. This heat sealer is the perfect solution for customers who run multiple patterns and need quick change-over with very little down-time.

Features & Benefits:

- Programmable & variable heat dwell time - change as needed, per material
- Speeds up to 100' per minute
*product and material width dependent
- Heat-up time <10 minutes
- Easy to use & validate
- Constant air cushion provides quieter & more accurate repetition
- Variable wattage heating - compensates for heat loss
- Servo-driven, cam actuated - minimized mechanics for ease of maintenance and changeover
- 13" or 18" web width
- Seals up to 312 sq/in. (13") or 432 sq/in. (18")
- 2 minute plate change
- Uniform heat & superior seal
- Less expensive than rotary tooling
